

Die nördliche
Festung
des Ekkuharuto

Die nördliche Festung des Ekkuharuto

Die Baupläne basieren auf einem Modell, welches auf natürlichen Steinen aufgebaut ist. Das verschafft einen

realistischeren Eindruck. Die Steine sind durch Unterlegen kleiner Hölzchen und Stücken dicker Papierservietten vor Kippen gesichert. Die ersten Steinschichten genauso. Die Steinschichten werden solange unterlegt, bis die erste Schicht entsteht, die in beide Richtungen in Waage sind.

So gesehen ist der Bauplan nicht ganz vollständig. Man kann den unteren Teil an eigene Natursteine anpassen oder auch mit Ankersteinen unterbauen, bis die Höhen stimmen.

Am Ende dieses Bauplans findet man Fenster und Türen. Die kann man kopieren, ausschneiden und an den vorgesehen Stellen einsetzen

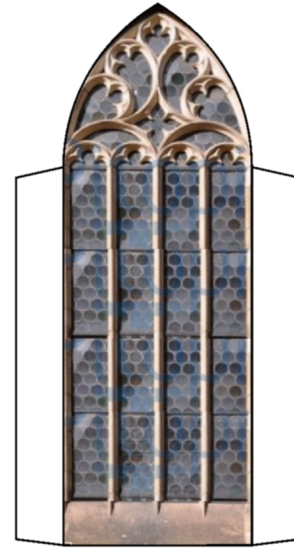

Viel Spaß bei Bauen.
